9th INTERNATIONAL EXHIBITION ON PLASTICS

EASTERN INDIA'S LARGEST PLASTICS EXHIBITION

NOVEMBER 25TH - 28TH, 2022

📍
Biswa Bangla Mela Prangan,
Kolkata, India

SUPPORTED BY

Indian Plastics Federation

ORGANISERS

Indian Plastics Federation (IPF) established in 1958, is the torch bearer for plastics in EASTERN INDIA.

IPF is one of the seven founder members of PLASTINDIA FOUNDATION.

With a strength of around 1000 members, it is well represented from all verticals ranging from Petrochemical producers, major and small plastic processors, machine manufacturers, ancillary equipment manufacturers, traders, distributors and agents.

With a focus of development on Plastics Industry its main activities include trade promotions, seminars and participation with the government in policy formation. IPF had facilitated a Poly Park on a 42 acre land with WBIDC and is in the process of identifying another Poly Park in near future.

IPF has developed a Knowledge Centre at the Poly Park on a 1.02 acre land to train unskilled and semi skilled labour required in the plastics industry.

Since 1981, when IPF organised the first ever Plastics Exhibition in India, it has held a total of 8 editions up till 2018. Owing to the past performance, the 9th edition has received tremendous support from the Industry and Government.

Venue: Biswa Bangla Mela Prangan

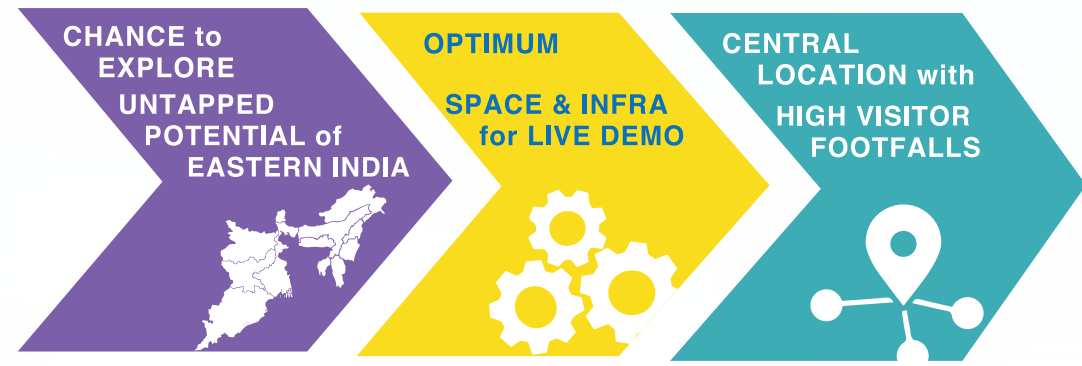

Indplas'22

LATEST EXHIBITION GROUND

Biswa Bangla Mela Prangan is India's most contemporary exhibition ground with world-class amenities including 2 fully air-conditioned pavilions of about 1,00,000 sqft each, fully air-conditioned food courts, seminar hall, press room and VIP lounges.

EXHIBITOR STATISTICS

- FMCG Packaging
- Irrigation
- Household Goods
- Recycling
- Raffia & Non Woven
- Flexible Packaging
- Writing Instruments
- Toys

LOGISTICAL CONVENIENCE

Eastern India's logistical convenience, which includes the ports of Kolkata, Haldia and Paradeep, provides significant potential for export and import expansion.

EFFORTLESS ACCESSIBILITY OF POLYMERS

Eastern India is a key producer of petroleum and petrochemicals. It has the advantage of accessibility and availability of polymers from Haldia Petrochemicals Ltd., Brahmaputra Crackers & Polymers Ltd and Indian Oil Corporation Ltd.

EXPLORE UNTAPPED POTENTIAL OF EASTERN INDIA

Eastern India is a growing region with the highest growth rate. The comparatively lower production of plastic goods provides massive scope for increase in such production opportunities.
